EDUCATION

University of Waterloo

Bachelor of Applied Science, Honours Management Engineering

Spring 2028

Waterloo, ON

- **Relevant Coursework:** Stochastic Models, Organizational Behaviour, DSA, Software Design, Intro to ML

EXPERIENCE

Communitech

Product Manager

May 2026 – Present

Waterloo, ON

- Cut timesheet entry time **70%** company-wide, shipping an agentic AI tool that auto-fills logs from M365 data.
- Protected launch timeline by surfacing system blockers pre-build and shifting to Azure Functions/Cosmos DB.
- Accelerated engineering velocity by scoping the full PRD into **20+ user stories**, resolving ambiguity upfront.
- Achieved **90%+ AI accuracy** on time entries by designing a human-in-the-loop review flow before approval.
- Drove roadmap alignment across three organizations, briefing leadership on sprint progress and key tradeoffs.

Spectrum Health Care

Data Engineer Intern

Sept. 2025 – Dec. 2025

Toronto, ON

- Delivered compliance platform overhaul by solely authoring PRD, scoping epics, and managing sprint priorities.
- Identified high-impact features by running **50+** stakeholder interviews across scheduling, intake, and ops teams.
- Drove **40%** error reduction and **65%** ops time savings by developing a **100K+** record/month validation pipeline.
- Lowered task completion time **10%** by mapping E2E user flows for **3** compliance workflows, resolving key UX gaps.

TD Bank

Technical Product Intern

Jan. 2025 – May 2025

Toronto, ON

- Defined AML dashboard features through **20+** stakeholder and analyst interviews, cutting report time **40%**.
- Optimized feature rollout with A/B testing of pipeline configs across **8** teams using user behavior analysis.
- Accelerated GTM decisions by **3 weeks** by building a product metrics framework for executive-facing dashboards.
- Achieved **95%** on-time releases by facilitating agile ceremonies and translating PRDs to TDDs for dev teams.
- Improved dashboard load reliability by partnering with data engineering to reduce ETL pipeline latency by **35%**.

Kal-Polymers

Advanced Manufacturing Engineer Intern

May 2024 – Aug. 2024

Mississauga, ON

- Eliminated **40 hours/week** of downtime by leading process redesign using value stream mapping and Kaizen.
- Reduced operator training time **30%** by designing journey maps that uncovered **12** high-friction touchpoints.
- Boosted throughput **20%** by applying Lean Six Sigma to production and formalizing improvements into SOPs.
- Maximized machine uptime **95%** by prioritizing **8** initiatives with the plant manager, sequenced by impact and cost.
- Sustained improvement cycles by running structured cross-functional retrospectives across engineering and production teams.

PROJECTS

[Singe](#) | Next.js 15, React 19, TypeScript, Supabase, Gemini 2.5 Flash, Three.js, PostHog

Feb. 2026

- Built a social platform from 0 to 1 where students roast themselves and track how “cooked” they are.
- Reached **5,000+ users globally**, **215+ day-one users** and **24% bounce rate** through organic growth alone.
- Built retention loop – daily streaks, global leaderboard, score history – fully instrumented with **PostHog** analytics.
- Iterated **Gemini 2.5 Flash** prompts for shareability; shipped **html2canvas** result cards to drive K-factor growth.

SKILLS

Product: Discovery-to-Delivery, PRDs, OKRs, North Star Metrics, Roadmapping, GTM Strategy, A/B Testing, Agile/Scrum

Analytics: PostHog, Funnel Analysis, Retention Modeling, SQL (PostgreSQL, MySQL), Python (Pandas, NumPy)

Design: Wireframing, User Flows, Information Architecture, Customer Journey Mapping

Technical: TypeScript, React, Next.js, REST APIs, Supabase, FastAPI, Azure Data Factory, Azure Functions

Tools: Jira, Asana, Figma, Azure DevOps, Aha!, GitHub Actions, Docker

Soft Skills: Cross-functional Leadership, Stakeholder Alignment, Data-Driven Prioritization, Executive Communication
